Early Registration	31 October 2003
Cancellation & Refund	15 November 2003

Message from the Chairperson of the Organising Committee

We would like to once again extend our invitation to you to attend the 8th Asian Pacific Society of Respirology (APSR) Congress which, due to the unexpected outbreak of SARS in the region from March to early June this year, has been rescheduled to be held from 1 to 4 December 2003. The venue of the Congress also has to be changed to the Sunway Lagoon Resort Hotel, Petaling Jaya, Malaysia.

As the Congress draws near, the secretariat and organising committee are working hard together to bring forth a hopefully enjoyable meeting, socially and for its scientific merit.

The rapid advances in the therapeutic and diagnostic development in respiratory medicine illustrate the need to take a long hard look at its application in clinical practice at bed-side. This issue will be extensively addressed at the Congress as the scientific programme will reflect on the theme of "An evidence-based approach to the management of respiratory disease in the Asian Pacific region". An impressive faculty of speakers, including several from the Asian Pacific region itself, will provide insights on these issues at the Congress. The pre-Congress workshops have been organised to provide a more intensive approach to four clinical issues namely Sleep Apnoea, Diagnostic And Interventional Pulmonology, Mechanical Ventilation and Immunotherapy For Allergic Diseases.

We are extremely pleased that the meeting is supported by an international fraternity of Respiratory Societies namely the American College of Chest Physicians, the European Respiratory Society and the American Thoracic Society. All three societies will be participating actively by pledging prominent speakers

and representation by senior members at the Congress. Their keen participation demonstrates the importance of this meeting for the Asian Pacific region.

We would also like to invite delegates to submit their research work for presentation at the Congress and to consider the Congress a platform to share their findings with other health care providers in the Asian Pacific region. For the first time, an APSR Award for Research on Asthma in the Asian Pacific region, will be given to the best free paper submitted for either oral or poster presentation at this Congress. Investigators are requested to indicate whether they wish to be considered for this award.

The Congress will be held at the [Sunway Lagoon Resort Hotel](#), an exciting venue which will keep you and your accompanying persons occupied during your free time. The Sunway Lagoon Resort Hotel is located in Petaling Jaya, approximately 30 kilometers away from Kuala Lumpur, the capital city of Malaysia. Petaling Jaya is a busy metropolitan that has a lot to offer, from its old buildings with Moorish elements, a heritage of its colonial past to the towering skyscrapers hailing the strides taken towards modernisation. With only a little effort, visitors can visit the rest of Malaysia that boasts a fascinating rich multi-cultural potpourri and natural beauty.

Once again, we do hope that you will take this opportunity to join us for the Congress and look forward to welcoming you to Malaysia.

Thank you.

Prof Chong-Kin Liam

Council

Asian Pacific Society of Respiriology

EXECUTIVE OFFICERS

<i>President</i>	Wah-Kit Lam
<i>Congress President</i>	Chong-Kin Liam
<i>Congress President-Elect</i>	Wah-Kit Lam

Congress Workshops

THURSDAY 1 DECEMBER 2003

WS 1 : SLEEP APNOEA

- Epidemiology of sleep An Asian Pacific perspective
- Pathogenesis of sleep apnoea Control of breathing
- Pathogenesis of sleep apnoea The upper airway
- Diagnostic considerations in sleep apnoea
- An approach to the management of sleep disordered breathing
- Excessive daytime sleepiness Non-apnoeic causes

WS 2 : INTERVENTIONAL PULMONOLOGY

- How to improve diagnostic yield from bronchoscopy techniques?
- Bronchoscopy for peripheral solitary pulmonary nodule
- The role of transbronchial lung biopsy in the 21st century
- Endobronchial ultrasonography
- Interventional pulmonology An overview for 2003
- Interventional bronchoscopy
- Selection criteria for interventional bronchoscopy
- Interventional bronchoscopy Which technique for which patient?
 - Foreign body removal
 - Nd YAG Laser
 - Electrosurgery
 - Argon plasma coagulation
 - Balloon bronchoplasty
 - Tracheobronchial stenting
- Medical thoracoscopy
- Interesting bronchoscopy cases

WS 3 : MECHANICAL VENTILATION

- ABC of mechanical ventilation
- Airway problems in the critically ill
- Mechanical ventilation in status asthmaticus and COPD
- New insights about the pathogenesis of lung injury Implications for treatment
- Ventilator-associated infections
- Weaning from mechanical ventilation
- Non-invasive ventilation and BiPAP

SUNDAY 4 DECEMBER 2003

WS 4 : IMMUNOTHERAPY

- Diagnosis of allergy
- Can immunotherapy prevent asthma?
- Who should have immunotherapy?
- Sublingual immunotherapy
