## Message from the President of the Malaysian Thoracic Society

Dear friends and colleagues,

It is my great pleasure to welcome you to the 10th Annual Congress of the Malaysian Thoracic Society which is held at the Swiss-Garden Resort & Spa, Kuantan, Pahang.

Professor Dr Mohammed Fauzi Abdul Rani and the Organising Committee have come up an interesting and exciting scientific programme which covers a wide range of respiratory disorders relevant to our clinical practice in Malaysia. In line with the theme of the congress, "Multidisciplinary Approach to Comprehensive Respiratory Care", we have invited a distinguished faculty of international, regional and local speakers to discuss issues such as obstructive airway diseases including asthma and COPD, interstitial lung disease, lung cancer, pulmonary infections including tuberculosis in HIV patients, and chronic suppurative lung disease in children. Non-invasive ventilation in adults and children as well as obstructive sleep apnoea and polysomnography shall be covered in depth in the pre-congress workshops. Interesting adult and paediatric respiratory cases will be presented in the Grand Rounds. The free paper oral and poster presentation sessions provide a good opportunity for some of the participants to share their clinical experience and research findings.

I sincerely hope you will gain invaluable knowledge and skills at this congress and work towards our common goal of elevating the standard of care for our patients with respiratory diseases. I also hope this Congress will provide you the opportunity to meet up with old friends and to make new ones. Lastly, I would like to express my sincere thanks to all who have lent their support and contribution to make this Congress a success.

## Message from the Chairman of the Lung Foundation of Malaysia

On behalf of the Lung Foundation of Malaysia (LFM), I am pleased to extend a warm welcome to all delegates of the 10<sup>th</sup> Malaysia Thoracic Society Annual Congress. It is indeed an honour for LFM to be invited as the co-organiser of this significant event.

Fuelled by the determination to help patients with chronic lung diseases to lead a better life with minimal suffering, a group of medical professionals and corporate citizens decided to establish the Lung Foundation of Malaysia in November 2005.

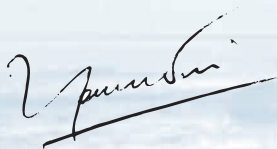

The Foundation is committed to improving the knowledge of healthcare professionals who are treating patients with lung diseases, increase public awareness and knowledge on the various types of lung diseases as well as to fund scientific researches to improve the treatment of lung disease. We also provide respiratory equipments and life support devices to patients with chronic lung disease. This task will be undertaken through proper assessment of the disease and financial capabilities of patients regardless of age, race and gender.

In a move to encourage research and development, LFM is proud to announce that beginning from this year we are providing awards for best oral and poster presentation as well as an annual research grant of up to RM50,000 to an individual or institution.

I would like to take this opportunity to congratulate the organising committee for successfully organising this year's congress at this beautiful and scenic resort.

I would also like to express my deepest gratitude to individuals and corporations for your continued support to the Foundation. I hope you would continue to support us in the future.

I hope all of you will have an exciting and fruitful meeting.

**Dr Zainudin B Md Zin**

## Message from the Organising Chairman of the 10<sup>th</sup> MTS Annual Congress

Dear friends and colleagues,

On behalf of the Organizing Committee for both Malaysian Thoracic Society Congress 2008 and 2<sup>nd</sup> National Bronchoscopy Workshop, I would like to extend the warmest welcome to all of you to the Congress and the Workshop in Kuantan, Pahang.

This year's Congress is slightly different from previous Congresses as it is done in conjunction with the 2<sup>nd</sup> National Bronchoscopy Workshop in Hospital Tengku Ampuan Afzan (HTAA), Kuantan. I hope participants in the Workshop will have a lot of stamina and perseverance to continue with the Congress in Swiss Garden Resort and Spa.

We have chosen the theme "Multidisciplinary Approach to Comprehensive Respiratory Care" to emphasize the need for all healthcare practitioners to synergize together as in many instances this approach will ensure optimum patient management.

The topics that have been included in the Congress constitute common respiratory conditions and they are delivered in perspectives relevant to the three main groups of participants – doctors, nurses and paramedics. The emphasis in the bronchoscopy workshop however is slightly skewed and specialized to cater for doctors with a keen interest in invasive bronchoscopy. We hope that these workshop sessions will spur further interest in these areas of respiratory medicine.

We have received quite a number of abstract submissions for both poster and oral presentations from all the respiratory centers in the country and of course we are very encouraged. I hope that the abstracts chosen by the Scientific Committee for oral presentation will excite a useful discussion between the judges and the authors. The abstracts for posters submitted this year cover many areas in respiratory medicine and again I hope the judges will find them challenging too.

The venue is a famous resort in the east coast – the coastline and the sceneries I hope will help you to unwind and relax as you enjoy the lectures and symposia.

I would like to thank all the sponsors, International Islamic University Malaysia and Hospital Tengku Ampuan Afzan for their invaluable support without which this event will not be as it is this year.

Finally, I wish to express my heartfelt gratitude to the Organizing Committee members for their tireless work and sacrifices to ensure this year's Congress and Workshop are a success.

I am confident that they both will be.

*M Fauzi*
