ROLE OF INTERVENTIONAL PULMONOLOGIST IN LUNG CANCER DIAGNOSTICS & THERAPEUTICS

Course description

A State of the Art Review on Imaging, Diagnosis, Staging and Treatment of Lung Cancer. New technologies aimed at imaging for early lung cancer detection, precision targeting of pulmonary nodules, endoscopic ultrasound for mediastinal staging as well as therapeutic bronchoscopic and pleuroscopic techniques for palliation will be discussed. The course features didactic lectures by the experts and allows participants to have “hands-on” experience. In addition there are sessions on pathology, new staging classification of lung cancer as well as biomarkers for targeted, immunotherapy.

Who should attend

Specialists, trainees in Pulmonary Medicine, Oncology, Thoracic Surgery, Pathology and researchers with interest in lung cancer. CME points will be awarded.

National University Hospital Tower Block Level 10

18 August 2017

Registration: 7:30 – 8:00am

Welcome and Opening Remarks

8:10-8:45am Are we ready for CT screening? Peter Mazzone

8:45-9:15am Bronchoscopy for Lung Cancer: wash, brush, biopsy, needle.
Felix Herth

9:15-9:45am Staging the Mediastinum: bronchoscopist or surgeon?
Devanand Anantham

9:45-10:15am New Staging Classification of Lung Cancer. Peter Mazzone

COFFEE BREAK

10:30-11am Diagnostic and management approach to solitary pulmonary
nodule. Felix Herth

11-11:30am Novel Bronchoscopic Imaging for Early Central Airway Cancer.
Lee Pyng

11:30-12pm Central Airway Obstruction. Anne Hsu

12-12:30pm Pleuroscopy, Pleurodesis & Catheters in Malignant Pleural
Effusion. Lee Pyng

12:30-1pm Approach to cytology and small biopsies. Seet Ju Ee

LUNCH 1-2pm

1:10-1:35pm Genetic Biomarkers, Targeted and Immunotherapy. Ross Soo

1:35-2pm The Lung as Bystander of Oncologic Therapies. Peter Mazzone

HANDS-ON PRACTICE: 2- 6 pm

EBUS TBNA, Radial EBUS, Navigational Bronchoscopy, Rigid Bronchoscopy,
Airway stents, Pleuroscopy, Indwelling Pleural Catheter, Specimen
Preparation

GALA DINNER 7pm
